Voluntary Results Feedback Form

➤ *I am an examiner in Workgroup:* *Example: 3620 (optional)*

➤ *Relevant prior art found, search results used as follows:*

102 rejection
 103 rejection
 Cited as being of interest.
 Helped examiner better understand the invention.
 Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

Foreign Patent(s)
 Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ *Relevant prior art not found:*

Results verified the lack of relevant prior art (helped determine patentability).
 Results were not useful in determining patentability or understanding the invention.

Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC3600 and on the EIC3600 NPL Web Page at <http://ptoweb/patents/stic/stic-ic3600.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

Identifying inventory information of stores having an address which is in proximity to an address designated by the customer; wherein each store's proximity to the designated address is determined by the processing unit by a first checking for an exact zip code match between the respective stores and the designated address, a second checking for a match of first n digits of the designated address zip code and the respective stores if there was not an exact zip code match, and a third checking for stores having a zip code within a range of the first n digits of the designated address zip code if there was not the exact zip code match and the first n digits of the zip codes did not match.

...Abstract: melding the technology underlying new web applications and legacy back-end systems, but unifying a customer's web shopping experience with their in-store shopping experience. For many businesses, this will mean giving online shoppers the option of having their purchases delivered, or picking them up themselves at a local storefront where they can also exchange items. While orders coming online today are likely to come from PC-based browsers, shoppers in the future will be placing their orders via webphones, WebTV, PalmPilots and other devices. And in-store shoppers may want to surf on kiosks to order merchandise which is not currently stocked locally.

...Abstract: the Arnhemland Progress Association is given to demonstrate the potential for positive strategies in remote area stores . The Association is a retailer owned by Aboriginal groups and operates 11 remote community stores . Factors such as price, Aboriginal buying habits, seasonality, consumer demand and most importantly remote area stock management affect the supply of and demand for food items . Further, government policy on sales tax and private sector capital city pricing policies influence retailing...

...planning models.

In Chapter 3, we apply our Pareto-optimality techniques of Chapter 1 to address the efficiency of the buyer - seller transactions in a vertical distribution system. We suppose that the buyer, with a limited budget, is a retailer who has a monopolistic position for this product in the market which is different from the existing system inventory management models where they suppose the retailers' market to be one of perfect competition. We address the following questions: Why and how could seller and buyer cooperate to obtain high total system profits? What kind of mechanisms should they consider to...

...have found that not to be the case. Fewer than 30 percent of the line items stocked arrive with coded labels adequate for immediate use. The major reasons are poor compliance with standards by major suppliers, packages that (although properly labeled) contain multiple unlabeled units of issue, and local changes to units of issue to satisfy local customer demand. Even if all suppliers complied with MIL-STD-129J, the unit-of-issue problems would still require to label...
